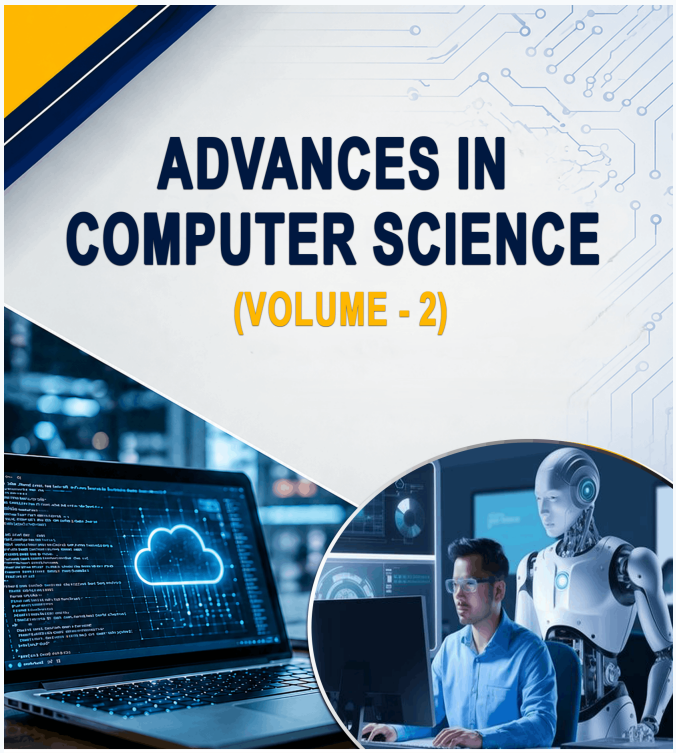
Call for Book Chapters / Research Papers

Academic Edited-Volume Publishing

Advances in Computer Science (Volume -2)

ENGINEERING AND TECHNOLOGY



EDITOR:
Dr. Pankaj Richhariya
CO - EDITOR:
Mrs. Nidhi Richhariya

AG VOLUMES

CATEGORY	Engineering and Technology
BISAC CODE	COM004000, COM021000, COM053000
PUBLISHER	AG Volumes
BOOK IMPRINT	AG Volumes, an imprint of AG Publishing House, publishes high-quality academic books and edited volumes, supporting researchers with professional editorial and publishing services.
REGISTRATION FEE	₹2000
DEADLINE	2026-11-30

IMPORTANT DATES SCHEDULE

Proposal submission	2026-10-14
Acceptance notification	2026-11-17
Full chapter submission	2026-10-29
Final chapter submission	2026-11-30
Publishing date	2026-12-24

SERIES EDITORS EDITORIAL LEADERSHIP

CHIEF EDITOR
Dr. Pankaj Richhariya
Chief Executive Officer (CEO)

EDITOR
Mrs. Nidhi Richhariya
Assistant Professor at SCOPE Global Skill University

SUBMISSION PROCEDURE AUTHOR GUIDANCE

1. Prepare an original, unpublished chapter relevant to the scope and recommended topics of the edited book.
2. Visit the book page and review the scope, topics, and submission requirements: Chapter Submission Form
3. Fill in the online submission form with the chapter title, author details, and co-author information (if applicable). or Email as on agvolumes@gmail.com
4. Upload your completed chapter in Word or PDF format .
5. The editorial team will review your submission and notify you required revisions.

OBJECTIVE KEY FOCUS

To present recent research, new technologies, and innovative ideas in computer science, helping researchers, students, and professionals improve their knowledge, explore practical applications, and support future research.

AIM & SCOPE
RESEARCH FOCUS

Advances in Computer Science (Volume 2) is a comprehensive collection of contemporary research, innovations, and emerging trends that continue to shape the rapidly evolving field of computer science. This volume brings together diverse perspectives on modern technologies, methodologies, and applications, providing valuable insights for researchers, academicians, professionals, and students.\r\n\r\nThe book explores a broad range of areas, including artificial intelligence, deep learning, data science, cloud computing, Internet of Things (IoT), cybersecurity, blockchain, computer networks, software engineering, and intelligent computing systems. Each chapter presents research-based knowledge, innovative approaches, and practical applications that address current challenges in computing and technology.\r\n\r\nThe volume shows how new ideas and technologies in computer science can be used to solve real-world problems. It brings together useful research, practical approaches, and different areas of computing, while encouraging further study, innovation, and collaboration.\r\n\r\nAdvances in Computer Science (Volume 2) serves as a valuable reference for postgraduate students, researchers, educators, and technology professionals seeking to expand their understanding of contemporary computer science.

TARGET AUDIENCE
INTENDED READERSHIP

This volume is intended for postgraduate students, research scholars, academicians, educators, software professionals, engineers, technology practitioners, and industry researchers working in computer science and related disciplines. It is particularly valuable for readers interested in emerging technologies, computational methods, artificial intelligence, data-driven systems, cybersecurity, software engineering, and intelligent computing. Researchers can use the volume to explore recent developments, identify research challenges, and develop new ideas for future investigation. Educators and students may use the chapters as supplementary academic material, while professionals can benefit from practical insights into modern computing applications. The volume also welcomes interdisciplinary researchers applying computational techniques to solve problems in science, engineering, business, and other domains.

AUTHOR BENEFITS

- ✓ Indexed in Google Scholar and other platforms
- ✓ Publication in an edited book series with ISBN
- ✓ Open access availability through AG Digital Library
- ✓ Improved discoverability and professional presentation
- ✓ Certificate for contributing authors

PUBLISHING SUPPORT

- Reviewing support from AG Reviewers
- Plagiarism checking service
- Submission management
- Registration management
- Individual author dashboard

SUBJECT AREAS
KEYWORDS

ARTIFICIAL INTELLIGENCE | MACHINE LEARNING | DEEP LEARNING | DATA SCIENCE | BIG DATA | COMPUTER SCIENCE | CYBERSECURITY | CLOUD COMPUTING | INTERNET OF THINGS | IOT | BLOCKCHAIN | COMPUTER NETWORKS | SOFTWARE ENGINEERING | DATA ANALYTICS | NATURAL LANGUAGE PROCESSING | COMPUTER VISION | INTELLIGENT SYSTEMS | NEURAL NETWORKS | PREDICTIVE ANALYTICS | INFORMATION TECHNOLOGY | DISTRIBUTED COMPUTING | EDGE COMPUTING

SUGGESTED TOPICS
INDICATIVE THEMES

Artificial Intelligence, Machine Learning, Deep Learning, Data Science, Big Data Analytics, Computer Vision, Natural Language Processing, Cybersecurity, Information Security, Cloud Computing, Edge Computing, Internet of Things (IoT), Blockchain, Computer Networks, Software Engineering, Database Systems, Web Technologies, Mobile Computing, Robotics, Neural Networks, Intelligent Systems, Computational Intelligence, Pattern Recognition, Human-Computer Interaction, Distributed Computing, Algorithms, Predictive Analytics, Automation, Emerging Technologies, and interdisciplinary applications of computer science.
